

# VOLKSWAGEN

GROUP OF AMERICA

To Whom It May Concern,

From our experience of managing and working with Steve Witt, we would like to recommend him as candidate for a position with your organization. During his tenure with VWGoA Chattanooga, Steve was a systems designer, developer and tester for our in-house Change Management Maintenance System. He was employed from November 2012 until the end of September 2013.

During his time with our company, Steve was a valuable part of our project development team and could always be counted on. He handled many individual projects and always added valuable feedback and insight from his vast experience. His attention to detail and ensuring program ease of use played a major part in the success during the updating of our system. He possesses a broad range of knowledge with database design and .NET programming.

He was always accepting of tasks assigned and would not hesitate to give constructive feedback for concerns or suggestions he may have. His communication with team members and business users was always professional and helpful. There was never a problem with his ability to understand the businesses needs and transform that into a complete yet user friendly design for the business to use.

I would greatly recommend Steve Witt to be a part of any project development team and I am sure he will be an asset to any company as he has been ours.

Yours truly,

Eric Keeton  
ITSF Manager  
Volkswagen Group of America  
Chattanooga Operations

Patrick Chapman  
ITSF Systems Analyst  
Volkswagen Group of America  
Chattanooga Operations
